

REVISION OF STDs & ANDROLOGY

BY

DR AMR ZAKY MD

STD S

CIRCUMCISED AND UNCIRCUMCISED GLANS PENIS

Male Reproductive System

- 1- Anatomy of male urethra
- 2- gonococci
- 3- Mode of infection of gonorrhea.
- 4- Site of samples taking from males & females in acute gonorrhea.
- 5- Culture in gonorrhea.
- 6- Colonial type of gonococcus.
- 7- Resistant strains of gonorrhea

- 8- Complain of males & females in gonorrhea.
- 9- gonorrhea in children
- 10- TTT OF GONORRHEA (single injectable)
- 11- Anorectal gonorrhea.
- 12- Physiological secretions from the penis
- 13- **Causes of penile ulcers.**
- 14- **Aetiology of non gonococcal uretheritis**

- 15- Definition of uretheritis
- 16- C/P of NGU.
- 17- Investigations of NGU.
- 18- TTT OF NGU
- 19- NON SPECIFIC URETHERITIS.
- 20- Postgonococcal Ureth.
- 21- Genital chlamydial infections
- 22- prostatitis

- 23- Prostatodinia&prostatorrhea.
- 24- Treatment of bacterial prostatitis
- 25- Causes of Epididymitis
- 26- DD of epididymitis (torsion)
- 27-Cause of lymphogranuloma venerum
- 28-CP OF LGV
- 29-Inguinal syndrome
- 30-Anorectal syndrome
- 31- Genital syndrome

32-Diagnosis of LGV

33- Causes of vaginal infections

34- Bacterial Vaginosis

35- Causes of PID

36- Causative organism of S

37- **Classification of S**

38- late & latent S

39- Manifestation 2ry stage of S

40- **Chancre & pseudo chancre redux**

41- **condom chancre& chancre redux**

42- **combined chancre**

43- **Phagedenic chancre.**

- 44- Serological test of S
- 45- Manifestations of late S
- 46- Stigmata of congenital S
- 47- Treatment of S.
- 48- Jarish-Herxheimer reaction
- 49- Relapses in S
- 50- Skin rashes in 2ry S

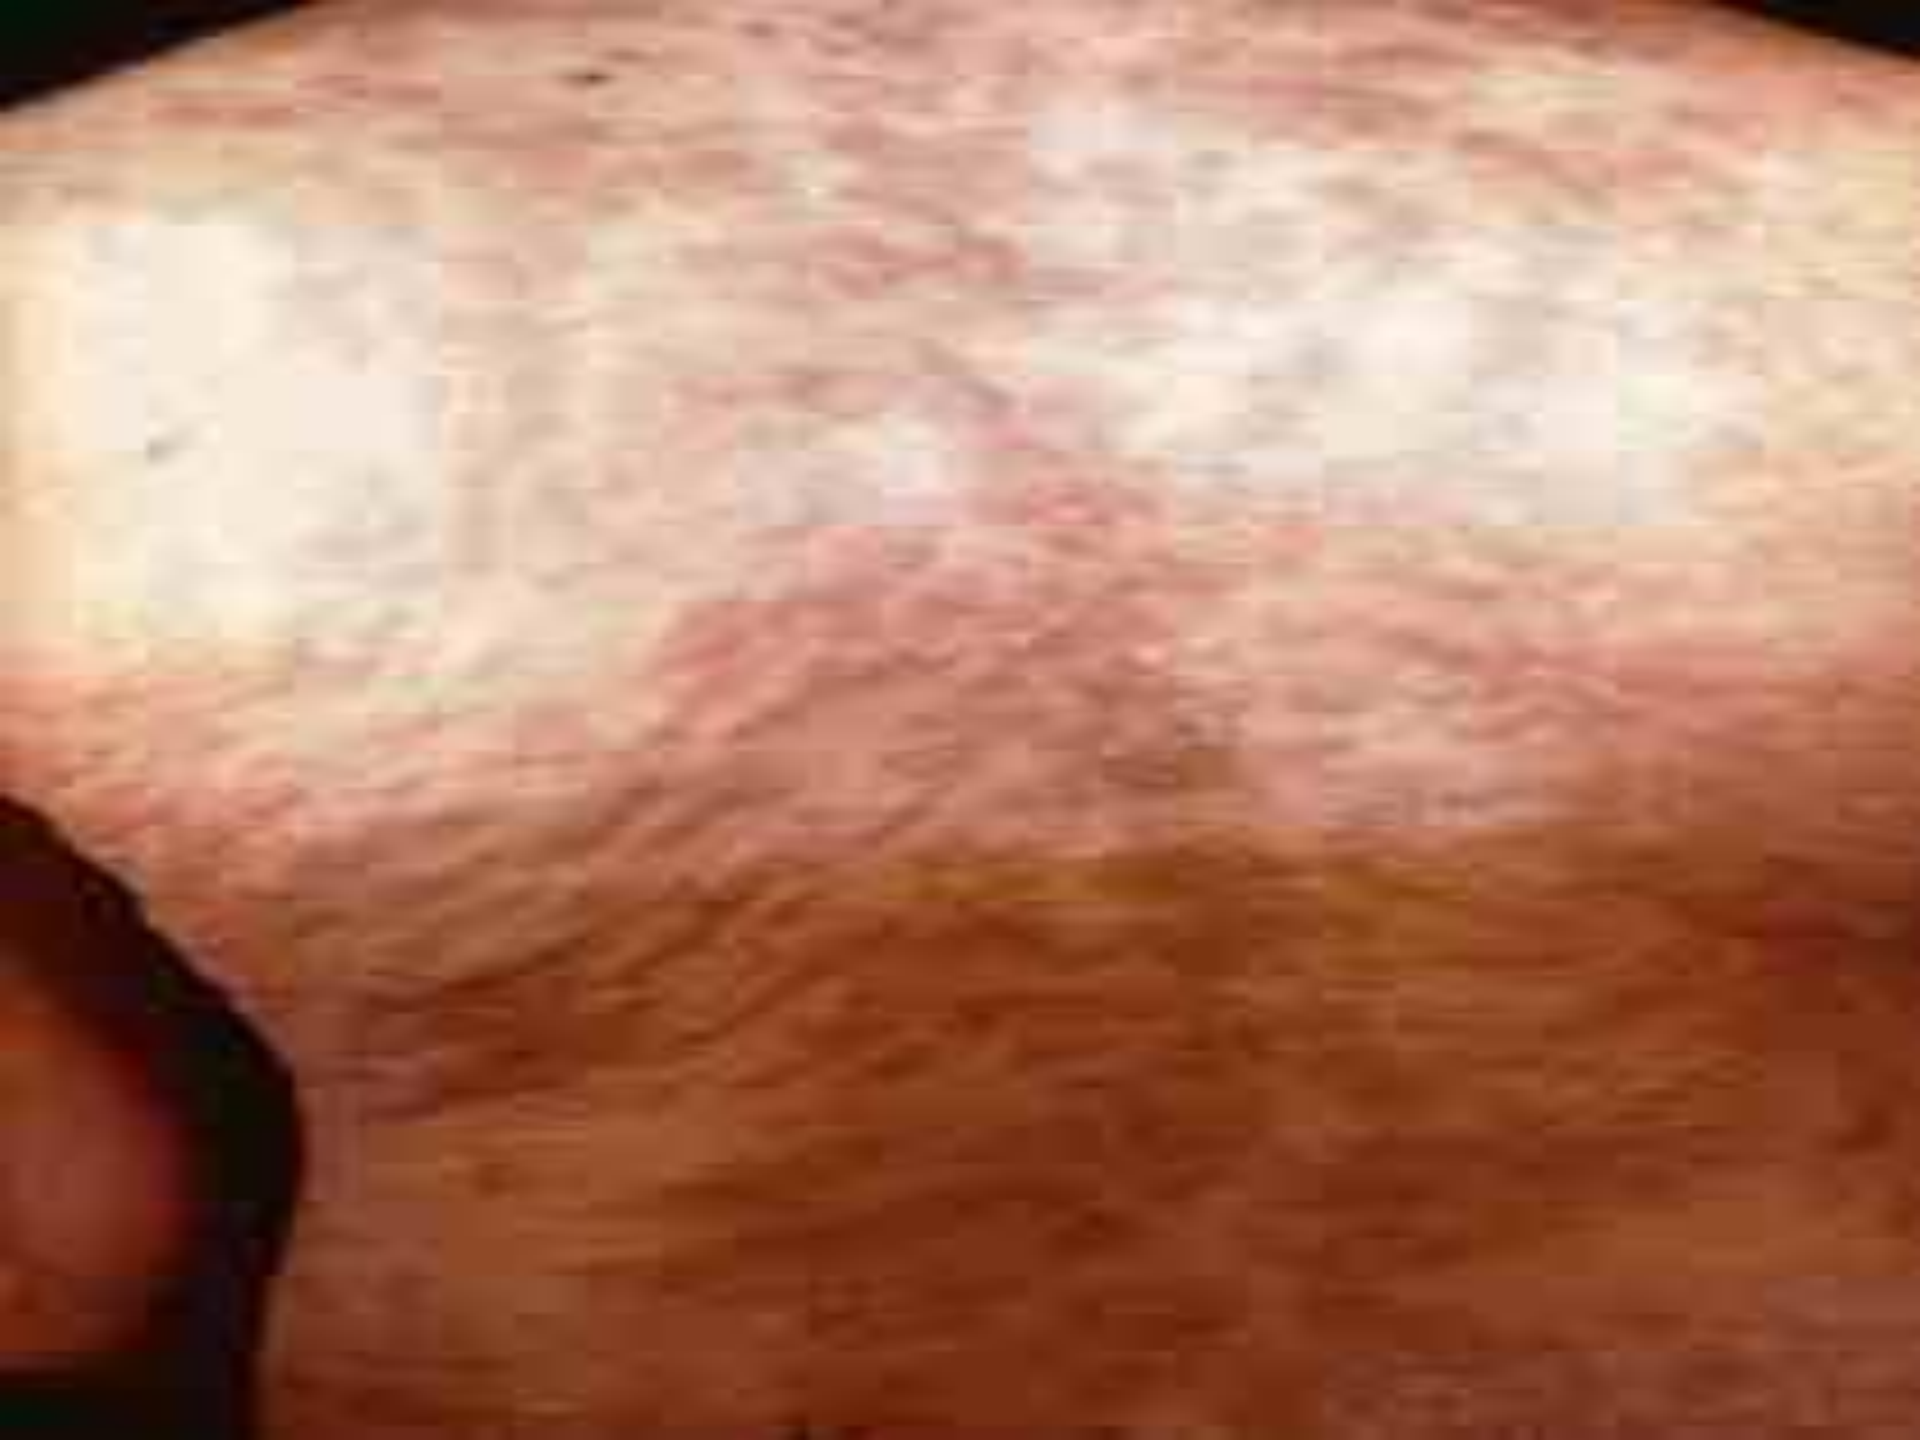

- 51- clinical manifestation of AIDS.
- 52- Laboratory investigation of Aids
- 53- Methods of transmissions of HIV.

- 58- Bacterial vaginosis
- 59- Herpes genitalis
- 60-Genital ulcers
- 61-Sclerosing lymphangitis
- 62-Chancroid

granuloma inguinale.
From Callen & Kurban
(eds). Dermatology
Signs of Internal Disease,
3rd edn. London:
Saunders, 2003.

16 12:54 AM

- Andrology & Sexology

- 1- Normal secretions from the penis
- 2- Sexual response cycle
- 3- E D
- 4- Anorgasmia
- 5- Aspermia
- 6- Delayed ejaculation
- 7- Anejaculation
- 8- Psychogenic & organic E D

8- premature ejaculation

9- IVLT

10- Dyspareunia

11- Varicocele

12- ART

13- Endocrinal infertility

14- Priapism

15- pyronies

16- haemospermia

17- Mumps orchitis

18- Drug induces ED

19- SILDINAFEL

20- Differentiation between psychogenic & venogenic & Arteriogenic ED from patient history.

21- retrograde ejaculation.

22- paraphilias

23- Chronic prostatitis & ED.

24- Azoospermia

25- Pretesticular causes of infertility

26- Testicular causes of infertility

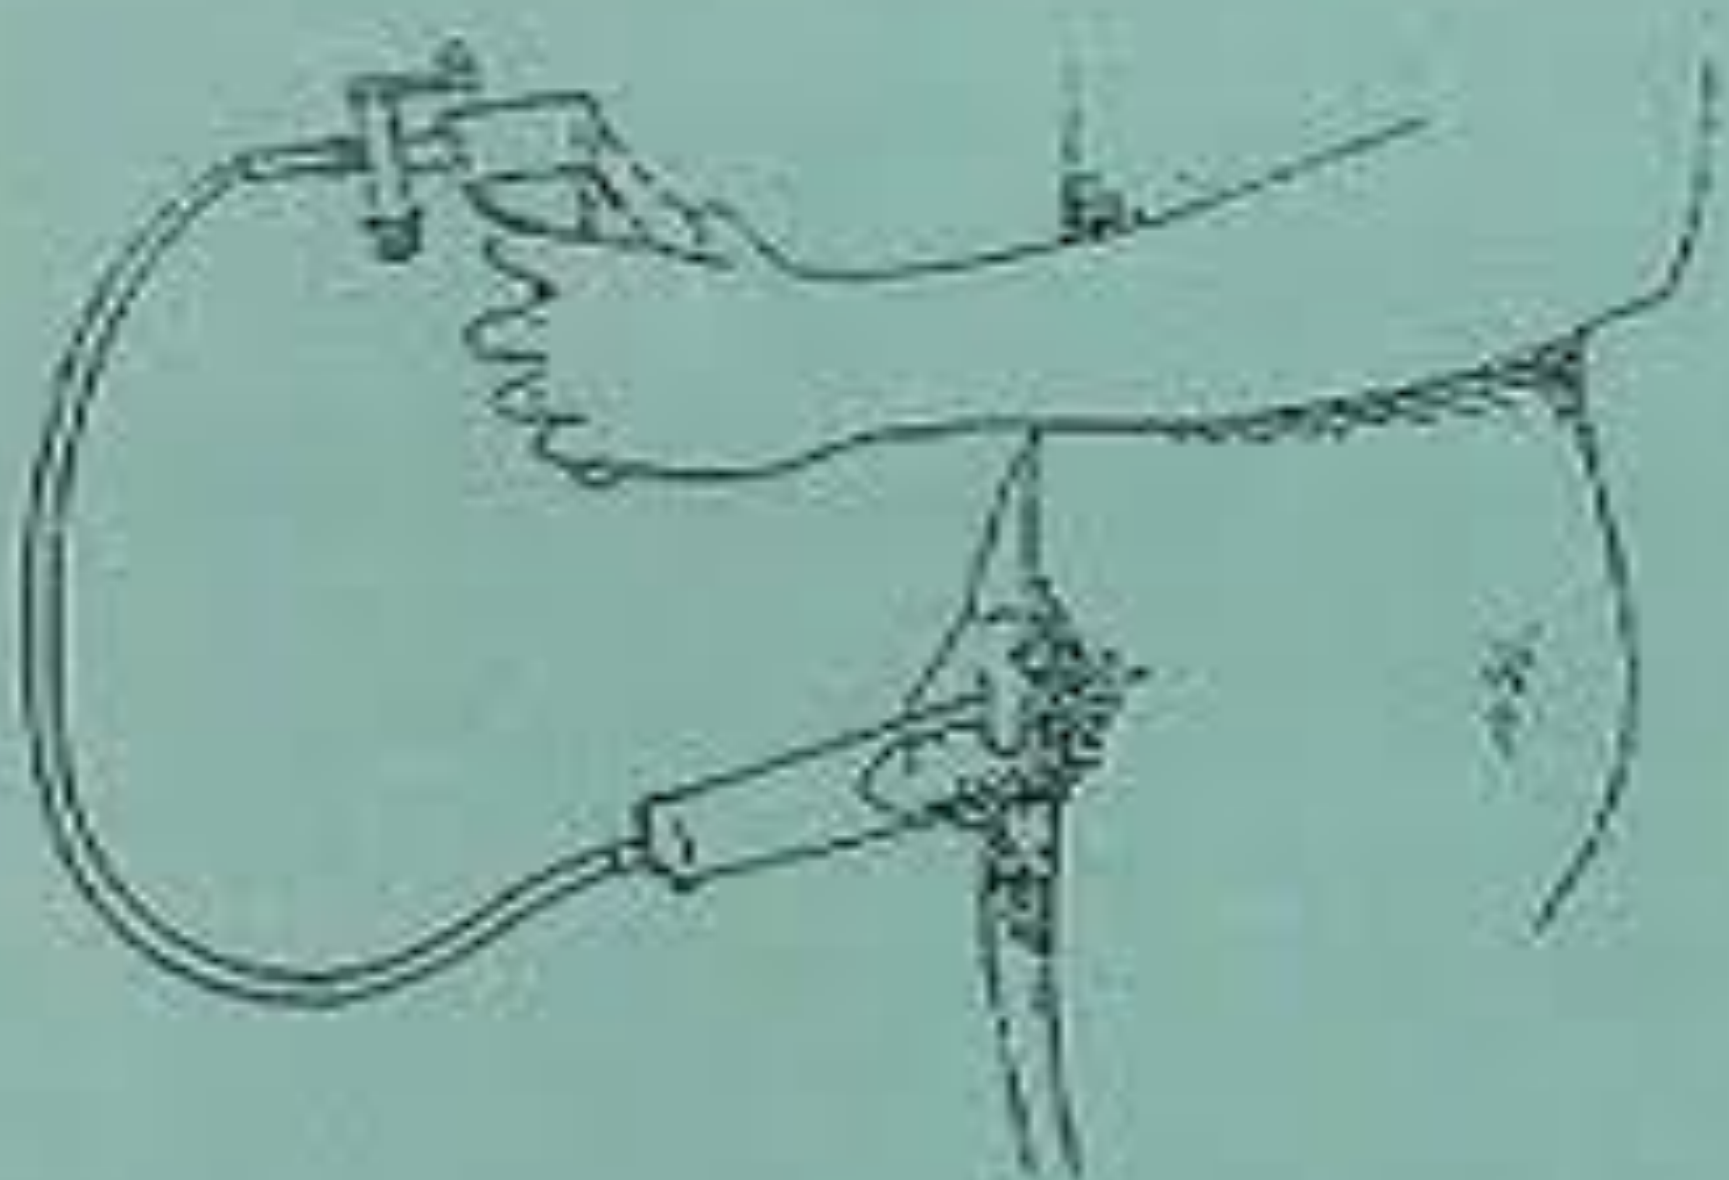

27- Posttesticular causes of infertility

28- Gonadotoxins

29- Sertoli cell

30- Indications for ICSI

- 31- Intracorporeal injection ICI
- 32- Normal seminogram
- 33- Fracutre penis
- 34- Vaccum constrictive devices
- 35-Regiscan
- 36- Empty scrotum
- 37-Vaginismus

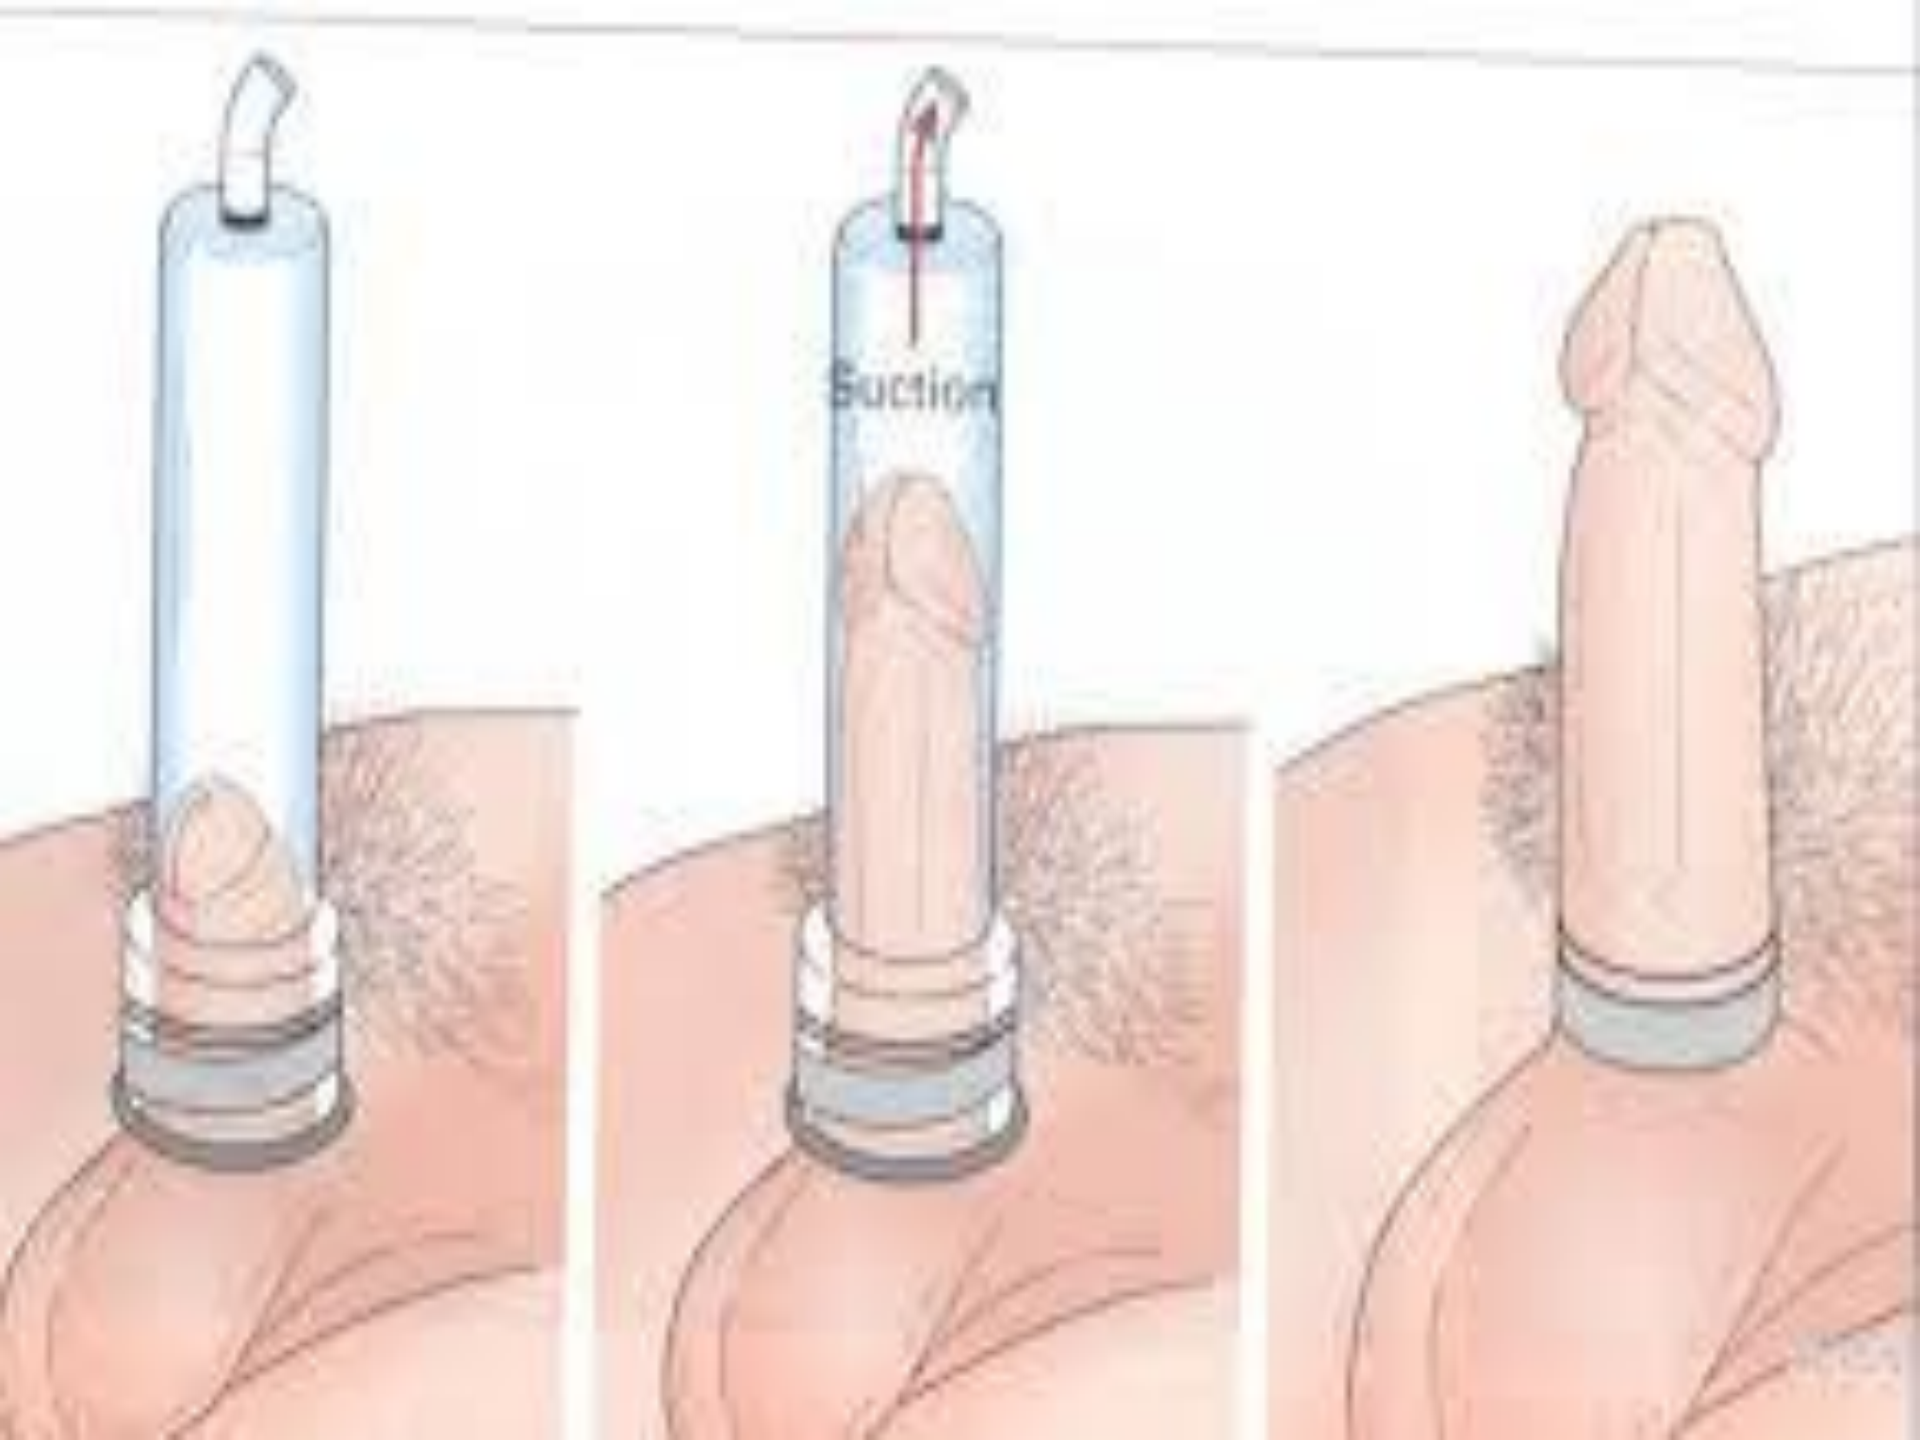

Figure 2: Vacuum constriction devices are made of a clear plastic cylinder with either a battery or hand pump attached, and a collection of sizes of rings.
